Is your organization ready for a paradigm-shifting announcement?

A 10-minute readiness check for any organization. No prior knowledge of UAP required. From a 5-person startup to a global enterprise.

What is this about?

The sitting U.S. Secretary of State is on record saying UAPs are penetrating restricted nuclear airspace. The former director of the government UAP Task Force has stated on camera he personally saw non-human craft and beings. 34 senior officials from both parties are on record in a documentary on Amazon Prime Video. The Pentagon released 162 classified files at war.gov/ufo in 2026. Deloitte classified this as a credible Black Swan. A Bank of England analyst warned central banks to prepare. This is not speculation. We are in an active disclosure process, and your organization is not prepared.

Colonel Karl Nell (ret. US Army, UAP Task Force) warns: controlled disclosure is being planned. The alternative — catastrophic disclosure — could cause societal disruption. Your organization is not prepared for either.

Controlled Disclosure	Catastrophic Disclosure
Governments manage the narrative in phases. Organizations have time to prepare. This is what LBDG toolkits are designed for.	Information released uncontrollably — by an adversary, a leak, or NHI itself. No preparation time. Nell's term for the scenario governments are actively trying to prevent.
