

FINANCIAL RISK OPERATIONAL
TOOLKIT

CFO & Risk Manager Playbook: Exposure Audit to 72-Hour Response

Five operational tools for CFOs, risk managers, and compliance officers. Designed to be completed, not read. Fill in the worksheets before any announcement. Activate the checklists at J0. Track triggers daily.

5 tools

CFO · Risk · Compliance

Edition 2025

Toolkit contents:

- ▶ Tool 1 — Sector Exposure Audit (fill-in worksheet)
- ▶ Tool 2 — Scenario Decision Tree (A / B1 / B2 / C)
- ▶ Tool 3 — 72-Hour Crisis Response Checklist (role-specific, with sign-off)
- ▶ Tool 4 — Trigger Threshold Monitor (daily tracking dashboard)
- ▶ Tool 5 — Compliance Quick-Check (legal checklist + board memo template)

Reference framework: The Nuclear Technology Analogy

Four scenarios: A (soft disclosure), B1 (crash retrieval confirmed, no tech mastered), B2 (partial reverse engineering, managed like nuclear weapons — not commercialized for 15-30 years), C (active contact). Energy disruption is a generational risk in B2+, not a quarterly financial model variable.

HOW TO USE THIS TOOLKIT

Three phases. Complete Tools 1 and 2 before any announcement. Activate Tool 3 at J0. Run Tool 4 daily. Use Tool 5 whenever compliance questions arise.

	PHASE 1 BEFORE J-30 to J0	PHASE 2 ANNOUNCEMENT J0 to J+3	PHASE 3 ONGOING J+1 to J+90
Tools:	Tool 1 — Sector Audit Tool 2 — Decision Tree	Tool 3 — 72h Checklist Tool 5 — Compliance	Tool 4 — Trigger Monitor Tool 5 (ongoing)

TOOL 1 — SECTOR EXPOSURE AUDIT

PHASE 1 — Complete before any announcement. Update quarterly. Owner: CFO or Head of Risk.

 **Instructions:** For each sector, fill in your organization's exposure (% of portfolio, revenue dependency, or supply chain link). Score vulnerability 1-5. Add hedge status and pre-authorized action. This becomes your activation guide at J0.

Sector	Exposure % (fill in)	Vulnerability 1-5	Hedge Y/N	Scenario Risk	Pre-authorized Action
Defense — in circle of trust	_____	1 2 3 4 5	☐ Y ☐ N	B1/B2/C: STRONG +	<i>Hold / increase</i>
Defense — legacy programs exposure	_____	1 2 3 4 5	☐ Y ☐ N	B2/C: LEGAL RISK	<i>Legal review before acting</i>
Energy — conventional / utilities	_____	1 2 3 4 5	☐ Y ☐ N	B2: 20-30y horizon only	<i>Monitor — no immediate action</i>
Airlines / Travel	_____	1 2 3 4 5	☐ Y ☐ N	A/B1/C: NEGATIVE	<i>Reduce / hedge pre-event</i>
Financials / Banks	_____	1 2 3 4 5	☐ Y ☐ N	B1/C: MODERATE -	<i>Review funding stress exposure</i>
Gold / Precious metals	_____	1 2 3 4 5	☐ Y ☐ N	All: SAFE HAVEN	<i>Hold / increase position</i>
Cybersecurity / Electronic Warfare	_____	1 2 3 4 5	☐ Y ☐ N	B1/B2/C: STRONG +	<i>Hold / increase position</i>
Rare earths / Advanced materials	_____	1 2 3 4 5	☐ Y ☐ N	B2: POSITIVE	<i>Review supply chain exposure</i>
Consumer staples	_____	1 2 3 4 5	☐ Y ☐ N	All: ROTATION TARGET	<i>Safe-haven rotation destination</i>

Portfolio Concentration Summary (fill in)

Top 3 most exposed sectors	1. _____ 2. _____ 3. _____
Total exposure to Scenario C losers (% AUM)	_____

Current hedge ratio on vulnerable positions	_____
Liquidity available to act in first 48h	_____
Date of last review	_____
Signed off by (CFO)	_____

TOOL 2 — SCENARIO IDENTIFICATION DECISION TREE

PHASE 1 AND 2 — Complete in advance. Work through questions in order at J0 to identify the active scenario.

 **Instructions:** At announcement, answer each question in order. Circle YES or NO. The path leads to your active scenario. Activate the corresponding playbook from Tool 3.

#	Question	Your answer	Go to
1	Has any government officially confirmed the existence of UAP / NHI phenomenon or programs?	☐ YES ☐ NO	YES → Step 2 NO → Wait. No scenario activated.
2	Has any government confirmed the recovery of non-human craft or materials?	☐ YES ☐ NO	YES → Step 3 NO → SCENARIO A
3	Has any government confirmed that reverse engineering programs produced functional results or military applications?	☐ YES ☐ NO ☐ UNCLEAR	YES → Step 4 NO → SCENARIO B1 UNCLEAR → Treat as B1
4	Is there confirmation of ongoing active contact (not historical) with non-human intelligence?	☐ YES ☐ NO	YES → SCENARIO C NO → SCENARIO B2

Scenario Quick Reference (circle at J0)

SCENARIO A Soft Disclosure	SCENARIO B1 Crash Retrieval Confirmed	SCENARIO B2 Partial Reverse Engineering	SCENARIO C Full / Ongoing Contact
Market: 2-5% drawdown Energy: Minimal Defense: Mild + Recovery: 2-4 weeks	Market: 5-12% drawdown Energy: No direct impact Defense: + but asymmetric (legal) Recovery: 4-8 weeks	Market: 8-18% drawdown Energy: 20-30y horizon only Defense circle: Strong + Defense outside: Legal risk Recovery: 6-18 months	Market: 15-30% drawdown Energy: If tech transfer implied Defense: Max outperformer Currencies: USD/CHF/JPY bid Recovery: 12-36 months

TOOL 3 — 72-HOUR CRISIS RESPONSE CHECKLIST

PHASE 2 — Activate at J0. Print this page. Each action must be signed off by the named role.

KEY

Adapted from FSB March 2020 review: Institutions that froze capital deployment and activated funding lines in the first 24h survived intact. Act on the protocol — not on interpretation of the announcement content.

Done	Owner	Action	By When
H + 0 — IMMEDIATE (WITHIN 1 HOUR)			
☐	CFO	Activate crisis team: CFO, CRO, General Counsel, Head of IR. Physical or video call.	H+1
☐	CFO	Use Tool 2 to identify active scenario. Record on this sheet: SCENARIO = ____	H+1
☐	CFO	Freeze all non-essential capital allocation: M&A, buybacks, uncommitted investments.	H+1
☐	General Counsel	Confirm no immediate Reg FD / AMF / FCA disclosure obligation triggered. Advise CFO in writing.	H+1
☐	Head of IR	Hold all external communications. No statements or analyst calls without Legal sign-off.	H+1
H + 1 TO H + 4 — LIQUIDITY AND EXPOSURE ASSESSMENT			
☐	Treasurer	Re-run liquidity forecast with 3 stress scenarios: mild (-10%), moderate (-20%), severe (-30%).	H+4
☐	Treasurer	Review all collateral and margin requirements. Identify facilities available to draw immediately.	H+4
☐	CRO	Run sector exposure review using Tool 1. Flag any positions above pre-defined thresholds.	H+4
☐	CRO	Calculate mark-to-market on disclosed positions using intraday data. Report to CFO.	H+4
☐	Treasurer	Pre-notify primary banking relationships. Do not draw yet — establish contact and alert.	H+4

H + 4 TO H + 24 — DECISION, GOVERNANCE, AND COMMUNICATION

☐	CFO	First board briefing: scenario identified, exposure assessed, actions taken, disclosure status.	H+12
☐	General Counsel	Complete compliance checklist (Tool 5). Confirm materiality analysis documented.	H+12
☐	CFO	Activate contingency funding lines if drawdown exceeds pre-defined threshold (Tool 4).	H+24
☐	Head of IR	Draft holding statement (Tool 5 template). Obtain Legal + CEO sign-off before issuing.	H+24
☐	CRO	Run reverse stress test: at what drawdown do covenants breach? When is liquidity exhausted?	H+24

H + 24 TO H + 72 — STABILIZATION AND MONITORING

☐	Treasurer	Hourly liquidity check-ins if VIX > 35. Daily otherwise. Report to CFO each morning.	Ongoing
☐	CRO	Run scenario-specific sector drawdown model. Begin identifying rotation targets.	H+48
☐	CFO	Second board briefing: updated exposure, market developments, forward scenario view.	H+48
☐	General Counsel	Review whether periodic filings need risk factor updates. Flag to external auditors.	H+72
☐	Head of IR	Prepare analyst / investor briefing package. Legal sign-off required before use.	H+72

LEGAL

Scenario B2 / C additional action: If scenario identification returns B2 or C, initiate outside counsel review of any defense contractor exposure for legacy program legal risk immediately. Do not wait for public information. This is a confidential internal legal review, not a disclosure event.

TOOL 4 — TRIGGER THRESHOLD MONITOR

PHASE 3 — Fill in daily. Pre-define your thresholds now, before any announcement. Escalation is automatic when a threshold is hit.

 **Instructions: Fill in the "Your Threshold" column now. At J0, monitor daily and mark status.**

Trigger	Reference Threshold	Your Threshold (fill in)	Status Today	Escalation Action
MARKET TRIGGERS				
Equity drawdown	>5% in 24h	_____		☐ OK ☐ HIT → Escalate to CFO. Freeze capital.
Equity drawdown	>15% in 72h	_____		☐ OK ☐ HIT → Crisis committee. Activate funding lines.
VIX level	>35	_____		☐ OK ☐ HIT → Hourly liquidity monitoring.
Gold price move	>5% in 24h	_____		☐ OK ☐ HIT → Scenario escalation signal. Review.
CREDIT AND FUNDING TRIGGERS				
Credit spread widening	>50bps	_____		☐ OK ☐ HIT → Review refinancing. Assess covenants.
CDS spread widening	>100bps	_____		☐ OK ☐ HIT → CFO/CEO alert. External counsel.
Margin call vs buffer	>20% of buffer	_____		☐ OK ☐ HIT → Activate contingency

			funding.
Revolving credit drawn	>50% of facility	_____	☐ OK ☐ HIT → Board notification required.
LEADING INDICATORS AND COMPLIANCE TRIGGERS			
Congressional NHI hearing scheduled	Any announcement	N/A	☐ No ☐ YES → Initiate legal exposure review (Tool 5).
Whistleblower filing citing contractors	Any filing	N/A	☐ No ☐ YES → Outside counsel immediately.
Defense contractor CDS spike	>200bps on key names	_____	☐ OK ☐ HIT → Review legacy program exposure.
Amnesty legislation introduced	Any bill introduced	N/A	☐ No ☐ YES → Upgrade scenario to pre-B2 posture.

Daily Monitoring Log (fill in each trading day)

Date	Scenario (A/B1/B2/C)	Triggers Hit	Liquidity % buffer used	Key event today	Action taken

TOOL 5 — COMPLIANCE QUICK-CHECK

PHASES 2 AND 3 — Complete within 24h of any announcement. Owner: General Counsel + CFO.

LEGAL

Legal principle: No special carve-out exists for extraordinary information. If information is material and nonpublic, ordinary securities law duties apply under SEC Reg FD, EU MAR, and UK MAR regardless of subject matter.

Step 1 — Materiality Test

Done	Question	Answer
☐	Would a reasonable investor consider this information important in making an investment decision?	☐ YES ☐ NO
☐	Does this information significantly alter the total mix of facts available to investors?	☐ YES ☐ NO
☐	Has this information been selectively shared with any market professional or investor? (If YES: Reg FD may be triggered)	☐ YES ☐ NO
☐	Do current risk factor disclosures in SEC / AMF filings adequately cover this risk? (If NO: filing update required)	☐ YES ☐ NO
☐	Has outside counsel reviewed this materiality analysis and signed off in writing?	☐ YES ☐ PENDING

Step 2 — Board Governance Protocol

Done	Action	Owner
☐	Convene board or disclosure committee within 24h of becoming aware of potentially material information.	CEO + Company Secretary
☐	Preserve attorney-client privilege — all discussions route through legal counsel.	General Counsel
☐	Record the materiality analysis formally: date, attendees, information considered, conclusion.	General Counsel

☐	Escalate to external securities counsel and auditors if the issue could affect filings or going-concern judgments.	General Counsel + CFO
☐	Do not issue any external statement, press release, or investor communication without Legal + CEO sign-off.	CFO + General Counsel

Holding Statement Template

[Company Name] Statement — [Date]

[Company Name] is aware of [describe the official announcement in one factual sentence from confirmed public sources only].

We are actively assessing the potential implications for our business and have activated our crisis management protocol. Our operations continue [normally / with the following adjustments: _____].

We will provide a further update on [date] or sooner if material information becomes available. Any statements regarding future implications represent forward-looking statements subject to significant uncertainty.

Investor enquiries: [IR contact] | Media enquiries: [PR contact]

REFERENCE: THE NUCLEAR ANALOGY AND LEGAL RISK

NUC LEA R

The nuclear technology precedent is the most rigorous framework for understanding how governments will manage confirmed non-human technology. Between Hiroshima (1945) and the first commercial reactor (1960s) there were 15-20 years of controlled military secrecy. Even today, military nuclear designs remain classified. Energy disruption from NHI technology belongs in a 20-30 year scenario, not a quarterly financial risk model.

LEG AL

Defense contractor legal risk (B2/C): Contractors who participated in legacy crash retrieval programs under classified government contracts may face asymmetric legal exposure: unfair competitive advantage claims, False Claims Act liability, IP ownership uncertainty. Monitor congressional testimony, whistleblower filings, and amnesty legislation as leading indicators. Do not name specific companies in internal documents without legal review.
